

Tvheadend - Bug #1397

Webui allows access only to admin users

2012-11-12 13:53 - Walter Purcaro

Status:	Fixed	Start date:	2012-11-12
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	User Interface	Estimated time:	0.00 hour
Target version:	3.2	Affected Versions:	3.2, 3.3
Found in version:	fc92e1ab6cc6dfa8eb8671d8e4545601610aa1		

Description

When I try to login as not-admin user, the server constantly asking for credentials, but if I give it the same every time, it continues to load ui, piece by piece. :S

I can also confirm this bug. However I don't think the Webui disallow access other user, it just you have to at least type in your username and password three times or few more, then just click cancel to certain point and then type in your username and password again before auth window can disappear.

I am running Tvheadend 3.2.18~g40a8920~precise.

#2 - 2012-11-13 13:09 - Walter Purcaro

I think I've understood what's wrong... smile.png

#3 - 2012-11-14 21:23 - Adam Sutton

- Status changed from New to Need feedback

Walter,

I've just submitted a fix for [#1393](#), I wonder if this fix may also fix this issue?

Could you check.

#4 - 2012-11-18 20:26 - Walter Purcaro

Apparently not. :(
I think this issue is simply an effect of have components under a same tabpanel with higher access permission level than that panel has.

#5 - 2012-11-20 22:35 - Adam Sutton

- Status changed from Need feedback to Accepted

- Target version set to 3.4

- Affected Versions 3.2, 3.3 added

I think the problem is basically the same problem as [#1393](#), but its a more pervasive problem.

I'll take a quick look, but its not my area of expertise.

Ok,

same problem different file. I believe it now works, however because I don't fully understand how the browsers handle auth changes (and it probably varies from browser to browser) it can be a bit contrived to get it to switch from one user to another.

But I consider that a separate issue that probably needs better management of auth on the UI.
