Hi Adam. When did you plan import option IDLE SCAN which was in version 3.4.27 but is not still in version 3.9.535 ? Please add this option with high priority...

I can understand it is frustrating not to have idle scanning but high priority? If you're really desperate for it I'd recommend sticking with 3.4.

For me personally I've noticed a big difference in tuning speed without idle scanning in 3.9, so I don't mind it being missing for the time being I just hope when it is reintroduced that it doesn't slow things down again.

- Subject changed from Initial scan to [Git Master] Missing feature: Idle scanning

#11 - 2014-04-17 11:31 - Adam Sutton

- Tracker changed from Feature to Bug
- Status changed from New to Accepted
- Found in version set to 3.9.543~gde0562c

Actually this can be moved to bugs, as its something that got lopped out but I've the intention of adding something back in.

it may not be quite as it was before, I'm not sure yet. But its pretty much the next thing I want to look at.
