

## Tvheadend - Bug #2046

### [Git Master] EPG disappears when a channel moves transponder. (Might not be a bug!)

2014-04-09 20:32 - Mark Clarkstone

<b>Target version:</b>		<b>Affected Versions:</b>	
<b>Found in version:</b>	3.9.509		
<b>Description</b>			
<p>There was a recent transponder move for channels Dave HD and Alibi HD on Astra 28E and before these channels moved epg was populated correctly but since moving I'm no longer getting full EPG data for these channels I only receive the current programme info.</p> <p>I have tested this with a spare machine and it populates the EPG correctly, I'm taking a guess here in saying that the SDT has been updated to point the epg data to the new transponder but tvheadend is still using the old service details?</p>
