

Tvheadend - Bug #2204

initial scan locks out webui and causes lost packages on xbmc stream

2014-08-07 20:24 - Rob vh

Status:	Fixed	Start date:	2014-08-07
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	DVB	Estimated time:	0.00 hour
Target version:		Affected Versions:	
Found in version:	3.9.1228		
Description			
<p>with 1228 I specified "skip initial scan" for my networks. yet, when I restart tvheadend, it is busy for 15 minutes scanning all my muxes. this uses all my 6 adapters. response time on the web ui is slow e.g. the Status display stays greyed out a lot. packages are lost, connection with xbmc is lost frequently. I wonder if scanning sets a critical lock and keeps it too long?</p>

It would really help if the initial scan didn't lock up all adapters.
