

Tvheadend - Bug #2220

Working great then loses signal on all multiplexes

Found in version:	3.3.402~ga958415		
Description			
<p>I have TVHE running on a Raspberry Pi and it was working great. Then it started to lose signal on some, and eventually all, muxes. I left it alone for a while then did a complete reinstall with latest versions. It worked great for a while then did the same thing again! Signal comes in via a splitter and the Humax on the other side of the splitter sees a great signal. When I swap leads the Humax is still happy and the Rpi still not.</p>			
What to do?
