

## Tvheadend - Feature #2411

### Scrambled channel information streamed

2014-10-22 20:21 - Rafal Kupiec

<b>Status:</b>	New	<b>Start date:</b>	2014-10-22
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	999		
<b>Description</b>			
<p>I think many of us has ever come across situation, when channel playback didn't start, due to the missing descrambling information. In this case it would be a nice feature if some image or short movie could be streamed in a loop. Instead of thinking why channel is not loading at all, users would see such information on their monitors and/or TV.</p> <p>The example of such 'view' can be seen on this picture: <a href="http://img546.imageshack.us/img546/5403/10809380.jpg">http://img546.imageshack.us/img546/5403/10809380.jpg</a> It is not a priority, but very nice feature that i think many of us would like to see ;-)</p>			

### History

#### #1 - 2014-10-23 15:00 - Sam Stenvall

Tvheadend already tells the client if descrambling isn't working, thus it is up to the player to display this information. XBMC already displays a notification in this case.

#### #2 - 2014-10-23 20:56 - Rafal Kupiec

I know that, but still other players, especially when using HTTP protocol will miss this information. Then optionally streaming some low bitrate video or static image with proper information would be a nice enhancement.

#### #3 - 2016-01-25 19:09 - Jaroslav Kysela

- Target version set to 999

#### #4 - 2017-11-26 11:07 - Rafal Kupiec

Any chance to get this implemented soon?

#### #5 - 2017-11-27 09:55 - Jaroslav Kysela

Not from me.
