Tvheadend - Feature #2527

XMLTV export support

2014-12-02 13:29 - Rafal Kupiec

Status:	Fixed		**Start date:**	2014-12-02
Priority:	Normal		**Due date:**	
Assignee:	Adam Sutton		**% Done:**	0%
Category:	EPG		**Estimated time:**	0.00 hour
Target version:	4.2			

Description
Please implement the ability to export EPG from tvheadend to XMLTV (maybe via API?).

History

+1 for this
https://tvheadend.org/boards/12/topics/10193

#2 - 2014-12-02 20:02 - Jaroslav Kysela

- Subject changed from XMLTV explort support to XMLTV export support

#3 - 2014-12-04 09:03 - Sam Stenvall

This would indeed be nice, though the easiest solution would be for someone to write an XMLTV grabber that used the tvheadend API. I started working on it once but never finished it. I also started working on a PHP API for tvheadend but never finished that either ;-)

#4 - 2015-08-07 13:03 - saen acro

Is there any movement on this feature?

#5 - 2015-09-21 16:29 - Jaroslav Kysela

- Target version set to 4.4

#6 - 2015-10-28 22:10 - Jaroslav Kysela

- Target version changed from 4.4 to 4.2

Implemented. I've not had time to test it:

```
http://localhost:9981/xmltv   # short alias for http://localhost:9981/xmltv/channels
http://localhost:9981/xmltv/channelname/*channelname*
http://localhost:9981/xmltv/channelnumber/*channelnumber*
http://localhost:9981/xmltv/tagname/*tagname*
```

#7 - 2015-11-04 21:47 - Jaroslav Kysela

- Status changed from New to Fixed

#8 - 2017-07-23 23:02 - B jzy

Thank you very much for implementing this Jaroslav. I am using it to feed PlexDVR the EPG for my TVH channels. The only challenge I've found is that it does not appear to include the <category> info in the XMLTV export. Is it possible to include this info as well? Right now, all programmes are defaulting to "Movie" in Plex (rather than Movie, Sports, Show, etc).

Sample from TVH-XMLTV export:
<programme start="20170723180000 -0700" stop="20170723200000 -0700" channel="21e76900def1417361dfe5908fe902c6">
<title lang="eng">Ace Ventura: Pet Detective</title>
<desc lang="eng">A bungling gumshoe uncovers more than just a simple kidnapping when he searches for the Miami Dolphins' missing mascot.</desc>
</programme>

The data exists in TVH already as seen here:

Thank you for considering.

I think that this feature request covers this topic: https://tvheadend.org/issues/4266

Still not fixed anyway sad.png
