

Tvheadend - Feature #2771

Tune errors are not reported through htsp when channel restart enabled

2015-04-11 12:17 - Mirko Di Paolo

Status:	Fixed	Start date:	2015-04-11
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	HTSP	Estimated time:	0.00 hour
Target version:	4.2		
Description			
<p>When channel restart is enabled tune errors and other errors are not reported through htsp (client doesn't display any sort of errors) Using this I get errors reported until restart is done:</p> <pre>--- src/subscriptions.c 2015-04-10 14:59:13.696005169 0200 ±± src/subscriptions.c 2015-04-10 15:01:33.968005268 0200 @ -350,7 +350,9 @ continue; } if (s->ths_flags & SUBSCRIPTION_RESTART) { - if (s->ths_channel) sm = streaming_msg_create_code(SMT_NOSTART, error); + streaming_target_deliver(s->ths_output, sm); + if (s->ths_channel) tvhwarn("subscription", "%04X: restarting channel %s", shortid(s), channel_get_name(s->ths_channel)); else</pre> <p>I think should be useful get tune errors on every tuner try and not only when all tuners were tried (having a lot of tuners I need to wait a while to get the first error reported).</p>
