

Tvheadend - Feature #300

[patch] report signal quality in htsp

2010-10-05 23:41 - Lars Op den Kamp -

Status:	Fixed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Andreas Smas	% Done:	0%
Category:	General	Estimated time:	0.00 hour
Target version:	2.12		
Description			
this patch reports the signal quality of a subscription via htsp. only the code for DVB devices is added, the others are marked with TODO			

History

#1 - 2010-10-06 09:54 - Lars Op den Kamp -

I'll have a look at integrating this in dvb_fe later this week so the ioctl call doesn't block the outgoing message.

the other patch ([#299](#)) should be fine

#2 - 2010-10-09 10:15 - Lars Op den Kamp -

hmm can't delete files in trac and I uploaded the patch twice smile.png

#3 - 2010-11-06 08:17 - ruud -

Hi, can confirm that this patch is working correctly and adds the advertised feature to tvheadend.

#4 - 2010-11-06 11:39 - Lars Op den Kamp -

noticed I forgot a break statement in src/transports.c

```
switch (current_transport->tht_type)
{
    case TRANSPORT_DVB:
        dvb_transport_get_signal_status(current_transport, status);
    case TRANSPORT_V4L:
        //TODO add signal status from a V4L adapter
        break;
    case TRANSPORT_IPTV:
        //TODO add signal status from an IPTV adapter
        break;
}
```

there should be a break; after dvb_transport_get_signal_status of course.

#5 - 2010-11-09 21:09 - Andreas Smas

Fixed (a bit different than those patches) in r5615

#6 - 2010-11-09 21:10 - Andreas Smas

- Found in version set to fixed
