Tvheadend - Bug #3015

TVH 4.05: Picon URLs cannot be deleted

2015-07-13 19:57 - Martin Walter

Found in version:	4.0.5		**Affected Versions:**	

Description

Configured TVH backend to use picons, but the matching was very bad (assume a problem with the picons, not TVH here).
I defined the picon path and checked the prefer picons of channel names at the time

Now I wanted to use my old channel icons again. Unchecked the prefer picons box, deleted the picon path and added the channel icon path. Settings were saved. When I then went into the channel configuration, the picon paths still appear in the GUI in the "User Icon" column. When I select the corresponding box, I can delete the picon path. It appears empty. But when I want to save the change, the picon path appears again. So effectively, I cannot delete it. Also, my "old" channel icons do not appear. Tried "reset icons", but also to no avail.

History

The mismatching picons have been a caching issue. Can be resolved via:

(1) TVH backend: Configuration -> General: Press "Clean image (icon) cache"
(2) TVH frontend: Reset PVR database

Thanks to sblack55, who figured it out here: http://forum.kodi.tv/showthread.php?tid=234287.
