Description			
Hi,			
I am now using the duplicate detection in my auto recordings. It's a great advantage to use!			
The problem is with one spec. recording. It is set for all times, channels,.... Only a name is set and record once per week.			
The program highlights all of them as duplicates and none are recorded.			
The series is actually running on different channels and times.			
Thanks for your help.			
Regards			
Moe

Ok, selecting a channel tag helps.

#2 - 2015-10-21 20:10 - M W

Sorry for the confusion, but it does not help.

Problem arises when different channels have a duplicate recording.

Regards

Moe

Do you wait one week ? Anyway, describe in detail with pictures what you're trying to do. It's confusing.
