

Tvheadend - Bug #3316

No channels will start playback

2015-11-18 09:59 - Martin Ayla

Description			
Hi			
Yesterday all channel playback stopped working (I had not changed anything in Tvheadend or Kodi).			
I'm using Tvheadend on Debian with two HDHomerun HDHR3-EU and Kodi 15.2 as the client with the built-in pvr.hts add-on.			
If I use another client to do the playback, directly from the HDHomerun's, without using Tvheadend, all channels work fine, so the problem must be between Tvh and Kodi.			
When starting playback, Kodi says "buffering..." and it just hangs there.			
Tvh outputs this in the log:			
Nov 18 09:50:20 debian_tvheadend[2719]: tvdhomerun: failed to set target: 0			
Nov 18 09:50:20 debian_tvheadend[2719]: tvdhomerun: failed to set_tuner_filter: 0			
Nov 18 09:50:20 debian_tvheadend[2719]: tvdhomerun: failed to set_tuner_filter: 0			
Nov 18 09:50:20 debian_tvheadend[2719]: tvdhomerun: failed to set_tuner_filter: 0			
Nov 18 09:50:20 debian_tvheadend[2719]: tvdhomerun: failed to set_tuner_filter: 0			
Nov 18 09:50:20 debian_tvheadend[2719]: tvdhomerun: failed to set_tuner_filter: 0			
Nov 18 09:50:20 debian_tvheadend[2719]: tvdhomerun: failed to set_tuner_filter: 0			
Nov 18 09:50:20 debian_tvheadend[2719]: tvdhomerun: failed to set_tuner_filter: 0			
Nov 18 09:50:20 debian_tvheadend[2719]: tvdhomerun: failed to set_tuner_filter: 0

Nov 18 09:52:20 debian_tvheadend[2719]: tvdhomerun: failed to set_tuner_filter: 0			
Nov 18 09:53:20 debian_tvheadend[2719]: subscription: 0007: service instance is bad, reason: No input detected			
Nov 18 09:54:20 debian_tvheadend[2719]: subscription: 0007: No input source available for subscription "10.0.1.199 ... "DR3"			
Any ideas?			
Thanks,			

History

Some extra info:

If I restart the Tvheadend service, I can always start the first channel and it works fine, but I can do any subsequent channel changes, if I try and change the channel the above errors happen.

#2 - 2015-11-18 10:16 - Martin Ayla

Also: Sometimes (but not always) the channel starts to play after several minutes of waiting.

#3 - 2015-11-18 12:24 - Martin Ayla

Update: I was scanning my syslog and noticed these errors:

```
systemd-timesyncd[215]: interval/delta/delay/jitter/drift 32s/-73.623s/0.010s/55.650s/+0ppm
```

```
systemd-timesyncd[215]: interval/delta/delay/jitter/drift 64s/+0.000s/0.014s/55.650s/+0ppm
```

```
systemd-timesyncd[215]: System time changed. Resyncing.
```

So I disabled my systems ntp time sync (through systemd) and immediately Tvheadend started working!?

Anyone know how that can be, how the ntp time sync can be connected to Tvheadend not tuning any channels and timing out?
