Description			
Hello !			
It should be cool to define which Stream Profiles a channel may select.			
For example for all my HD Channel I want use the stream Profile "profile1HD" and for all my SD channels I want tu use the dream profile "profile2SD".			
So, select a stream profile for one or most channel, or in inverse, select a channel tag or most to the stream profile.			
I don't know if i am clear ...			
Thank you very munch !
