

Tvheadend - Feature #3354

Way to manipulate Epg with HTTP api

2015-11-29 08:47 - Mario D

Status:	New	Start date:	2015-12-02
Priority:	Normal	Due date:

Target version:	4.6		
Description			
<p>I was trying to quickly implement some personal requirements (add information like imdb rating as rating of Epg and other stuff that I'm not sure it could go in tvheadend) using an external script. I discovered that this is actually impossible with the HTTP methods. Epg looks not managed by idnode system. Nothing to write to Epg database. Is epg going to be migrate to idnode? If the answer is no (performance!?), could you add an api to add/modify epg records.</p>			
Subtasks:			
Feature # 3371: season/episode data for german events			Rejected

History

#1 - 2015-12-01 09:00 - Jaroslav Kysela

- Target version set to 4.4

#2 - 2021-02-20 22:32 - Flole Systems

- Target version changed from 4.4 to 4.6
