

## Tvheadend - Feature #3365

### MUXes and Channels import / export

2015-12-01 13:43 - Rafal Kupiec

<b>Status:</b>	New	<b>Start date:</b>	2016-02-04
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Category:</b>	Configuration	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Description</b>			
<p>Please implement the feature allowing to import/export muxes&amp;channels between tvheadend instances. Lets say that you have several tvheadend installations in several locations, even using different hardware, but all of them receiving the same DVB-S satellites. It is hard to maintain all of them, especially when there are a lot of changes on transponders.</p> <p>Having such feature, I imagine that maintaining them would be much easier, when several conditions would be met: 1) all instances should have same "networks" assigned to proper tuners. 2) tvh should allow to export just one network at a time</p> <p>After exporting and importing such settings, TVH should automatically add previously exported muxes and then map channels like in source. Of course, muxes/services/channels belonging to exported network should be purged first.</p>			
<b>Subtasks:</b>			
Feature # 3553: import / export of settings and channels			<b>Rejected</b>

### History

#### #1 - 2015-12-01 19:54 - Rafal Kupiec

Proposed solution:

- 1) Let user choose which network to export and export MUXes and save into the file (fetchable via webui).
- 2) In import tab, let user choose into which network data should be imported and then:
  - a) Import all previously exported muxes into selected network
  - b) Rescan all muxes and fetch services OTA
  - c) Map services into channels and set correct channel numbers if exported channel was still found in point b.

bump?

#### #3 - 2016-09-11 12:44 - Rafal Kupiec

Any updates?

Maybe some other way of synchronisation between many TVH installations?
