Description			
Using Android Chrome it is not possible to scroll down the programs in the EPG list even if the bottom-right label says something like "Event 1-20 of 12123". It doesn't look a missing scrollbar but the script to fill up the list from the bottom is not activated in this scenario. It could be a bug in extjs.

ExtJS 3.4 does not play so good with the touch based devices. The touch events were added in ExtJS 5.0. It seems that the scrollbar is hidden for a reason. Perhaps, we can add navigation buttons to the bottom toolbar.
