

Tvheadend - Bug #3447

failed transcode not reported as failed recording

2015-12-28 18:58 - Martin Bednar

Description

I mistakenly compiled x264 with 10bit support, and transcoding upon recording failed (should I open another issue about that?). The transcoding fails with "libav : Specified pixel format yuv420p is invalid or not supported" in the log. The resulting recording contains only audio (is an mka file).
IMO it should be reported as failed, since sound without video is quite useless on a tv show...

History

The same happens when I select the x264rgb profile, which apparently isn't available on my system.
