

Tvheadend - Feature #3543

Internal "already recorded" database for duplicate check

2016-01-30 19:51 - Olli Nase

Status:	Fixed	Start date:	2016-01-30
Priority:	Normal	Due date:	
Assignee:	Adam Sutton	% Done:	0%
Category:	PVR / DVR	Estimated time:	0.00 hour
Target version:			
Description			
<p>I would like to have an internal database where tvh stores all previous recordings. Only successful recordings should be put into that database.</p> <p>To become a successful recording there should be some options which the user can check.</p> <ul style="list-style-type: none">- Minimum file size- Minimum video length- Maximum errors- Maximum discontinues <p>So if a recording should be done, tvh can check if that show has been already recorded. If this check is true tvh will not record it a second time.</p> <p>This duplicate check can be turned on in the recording profile.</p> <p>Background: I rename my recordings after they have been finished and move them into my global video folders. So the recording is not longer present for tvh duplicate check. Tvh will record the same show every time again and again. Thats not necessary and is blocking free tuners. Also every recording is set to failed because of file missing.</p> <p>Maybe there is a way to implement such a feature.</p>			

History

#1 - 2016-02-03 14:16 - Jaroslav Kysela

- Subject changed from Internal "already recorded" database for duplicate check to Internal "already recorded" database for duplicate check

#2 - 2016-05-11 08:51 - Kai Sommerfeld

I also really would like to see this feature.

#3 - 2022-06-12 13:33 - Dirk Diggler

Second that!

#4 - 2022-06-12 15:05 - Fiore Systems

- Status changed from New to Fixed

It's long been implemented.
