

Tvheadend - Bug #3600

DVR Autorec escaping requirement has changed but auto created rules do not respect it

Description

Hi,

I've discovered that in the latest master DVR autorec titles now need to have colons escaped like other special characters ("\" not \":").

Rules that are created with the "Record Series" or "Autorec" buttons do not escape them and so the rules don't match.

I've gone back to 4.0.8 and the rules match without escaping.

You're wrong. This bug has no relationship to regex. If you change anything in the string, it will work. Fixed in v4.1-1570-g9e66bb4 .

Sorry I was wrong, but glad you've fixed it, compiling now smile.png

In my defence the only one's that had issues were the ones with ":" in the title and even removing other parts of the title string did nothing, only removing the ":" or escaping it worked!
