

Tvheadend - Feature #3700

Add SSL support to buildin HTTP server

2016-04-07 12:53 - Guillaume DC

Status:	New	Start date:	2016-04-07
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Infrastructure	Estimated time:	0.00 hour
Target version:	999		
Description			
server name			
SSL support:			
- protocol until TLSv1.2			
- administrator add his own server.key			
- administrator add his own server.crt			
- administrator add his own dhparam.pem			
- HSTS			
- ciphers list			
Why not enable auth digest (htpasswd, htaccess)			
I think it's important to securise our tvh web server. So why not use a real SSL support.			

History

#1 - 2016-04-08 18:45 - Jaroslav Kysela

- Subject changed from Enhanced web server to Add SSL support to buildin HTTP server
- Target version set to 999

#2 - 2016-04-08 18:56 - Jaroslav Kysela

I added digest support to v4.1-1847-ge15d7fd .

The SSL support integration has low priority - you may use any proxy server like nginx to encrypt properly your external connection.

Yes, but I tried this and it does not work properly through proxy SSL nginx vhost ==> proxy pass to tvh web server

#5 - 2016-04-08 19:20 - Jaroslav Kysela

Nginx works (some users really using it), but you must configure it properly. For tvh you should use --http_root option to properly map paths, if you map tvh to a www path.

I made a topic for that but I had no answer.

I have used stunnel under Debian Linux for more than a two years now, works like a charm.
