Target version:	4.6		
Description			
I often want to filter out radio channels when sorting the service list from a certain satellite. I can now have greater than, less than and equals as a filter. However, in order to filter out radio channels (service type 2) I would need "not equal" as a filter. Can that be added?			

History

- Status changed from New to Rejected

Just put 2 to both less and greater fields.

#2 - 2016-04-14 18:02 - Olli Salonen

- File filter 22.PNG added

That did not work too well. I added 22 to both less and greater than fields and it works exactly the opposite to what I would expect. See the attachment.

#3 - 2016-04-14 18:04 - Olli Salonen

It seems to me that the filter is "equal or less than" and "equal or greater than". Also when both are specified, it seems to be AND instead of OR.

#4 - 2016-04-15 11:22 - Jaroslav Kysela

- Status changed from Rejected to New

Oops. Sorry, you're right.

#5 - 2016-04-29 10:36 - Jaroslav Kysela

- Target version set to 4.4

#6 - 2021-02-20 22:32 - Fiore Systems

- Target version changed from 4.4 to 4.6
