- File test.pcap added

Hi,

Anixe SD is a SCRAMBLED channel on T-Home Entertain which you can only watch with the T-Home iptv box.

But i am also struggling to watch the not scrambled channels with tvheadend and xbmc.
I have added the iptv service with the correct interface (eth1) and i can see that it joins the multicast group and that rtp packets are arriving on eth1. But xbmc complains about "no input detected".
Tvheadend says:

```
[INFO]:subscription: "192.168.1.110 [ XBMC Media Center ]" subscribing on "ard ip", weight: 150, adapter: "eth1", network: "<N/A>", mux: "239.35.129.11", provider: "<N/A>", service: "<N/A>", quality: 100
[DEBUG]:Service: eth1/239.35.129.11: Status changed to [Hardware input]
[DEBUG]:Service: eth1/239.35.129.11: Status changed to [Hardware input] [Graceperiod expired]
[INFO]:htsp: 192.168.1.110 [ XBMC Media Center ]: Disconnected
[INFO]:subscription: "192.168.1.110 [ XBMC Media Center ]" unsubscribing from "ard ip"
```

I am using the git version (cloned yesterday). I have added some debug output (not shown above) showing that tvheadend detects valid rtp packets and calls iptv_ts_input.
The multicast stream plays nicely with vlc.

I have added a pcap trace made on eth1 of the tvheadend machine. Any idea what might be wrong?

Btw, tvheadend rocks! :-)

#4 - 2011-03-16 01:30 - Micha C.

- File T-Home_vlc10x.m3u added

the streams work in vlc player with the file attached

in tvheadend i must add manual the pid and type in the rtp stream. No auto detect like DVB-T!?

thanks for help wink.png

long time ago

same problem

i add a service in iptv...like this

name: ZDF
 interface: eth1
 group: 239.35.10.5
 port: 10000

than i want to watch the channel but nothing happens. "service detail" shows nothing (no streams or any pid where auto detect)

i added the stream manually with the infos from vlc codec info
after this i have only a stuttering audio but no video

with vlc player the stream works perfect!

what can i do?
i need help to fix this

#8 - 2011-12-20 17:54 - Hein Rigolo

- Found in version set to unknown

are you running the latest version of tvheadend from git?

#9 - 2012-08-01 00:00 - Adam Sutton

- Status changed from Need feedback to Rejected

No feedback for 7 months, closing.

#10 - 2012-08-01 00:54 - Micha C.

it works with version 2.12.99 thanks
