<b>Description</b>			
Is there a way to add MHEG-5 EPG that all that's needed for TVHeadend to work feature fully in NZ as that's the way they transmit the guide on DVB-T. At the moment I have to rely on an NZ website to host an XMLTV guide and import it across, it works but is a pain to setup. If there is anything I can do to help with this please let me know.			
<b>Subtasks:</b>			
Feature # 4319: MHEG-5 rendering for off-air messages and similar			<b>Rejected</b>
