

## Tvheadend - Feature #3832

### EPG time related to UTC and Summertime

2016-05-29 11:39 - Fozzie Flop

<b>Status:</b>	New	<b>Start date:</b>	2016-05-29
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Adam Sutton	<b>% Done:</b>	0%
<b>Category:</b>	EPG	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	999		
<b>Description</b>			
Fairly new (6 months) to TVheadend (4.1.1721) but very happy user. Thx everybody who's developing and helping. smile.png			
I see very many subject related messages all over the internet old as well recent. Seems this is partly unclearness but also room for functional improvement. Humbly I state here my feature request to make this more user friendly. See: Configuration => DBV inputs => Networks => Edit Network:			
<ol style="list-style-type: none"><li>1. Change label for "EIT time offset" to "local time zone" and add city names to the list to choose from.</li><li>2. Add a checkbox to apply Summer time offset. Add mandatory boxes to let the user enter start date and end date for this. Alternatively, a time table from for example timeanddate.com could be used.</li><li>3. Add infobox to inform that changes in EPG will be visible depending on cron job settings in "Configuration =&gt; Channel/EPG =&gt; EPG Grabber" and may take up to 24 hours before visible in EPG.</li><li>4. Add infobox as information for following item below to alert user on per EPG settings.</li><li>5. Add an checkbox/radio per EPG to use UTC or local time zone setting in "Configuration =&gt; Channel/EPG =&gt; EPG Grabber Modules =&gt; Settings".</li><li>6. Add infobox to compliment the above.</li></ol>			

#### History

##### #1 - 2016-05-29 12:01 - Fozzie Flop

Edited to make things more clearly.

See: Configuration => DBV inputs => Networks => Edit Network:

Change label for "EIT time offset" to "local time zone" and add city names to the list to choose from.

1. Add a checkbox to apply Summer time offset. If checked, show mandatory boxes to let the user enter start date and end date for the summertime period. Alternatively, a time table from for example timeanddate.com could be used.
2. Add infobox to inform that changes in EPG will be visible depending on cron job settings in "Configuration => Channel/EPG => EPG Grabber" and may take up to 24 hours before visible in EPG.
3. Add infobox as information to alert user on per EPG settings.

See: Configuration => Channel/EPG => EPG Grabber Modules => Settings:

1. Add a checkbox/radio per EPG to use UTC or local time zone setting
2. Add infobox to compliment the above.
