

Tvheadend - Feature #3852

Feature # 3793 (New): TVheadend should care about Power

Should get an Inhibitor from systemd when has active subscriptions

Description

Hello,

Tvheadend should use the Inhibitor API (1) from systemd/logind to prevent/delay system suspend when it has active subscriptions.

I am currently using a python script that parses status.xml (2) and sets up a lock, but it's far from ideal.

(1) <https://www.freedesktop.org/wiki/Software/systemd/inhibit/>

(2) <http://127.0.0.1:9981/status.xml>

History

#1 - 2016-06-12 11:20 - Jaroslav Kysela

- Status changed from New to Rejected

- Parent task set to #3793

Rejected as a duplicate of [#3793](#) .
