#### Description

It would be great if you could update the path to a recorded file via the UI. I noticed today that after changing a setting in the UI, all my recordings were put into a new folder - this isn't actually the problem, the problem is, if I then decide I don't want that folder structure (or if I move the recorded TV folder to another drive) that there is no easy way to change the path to the file(s) so they show as deleted in the UI.

I believe there is an API to do this but it would be good if, in the "Edit Finished Recording" dialog of the "Finished Recordings" tab, the full path to the file was displayed and in advanced mode was editable. It doesn't necessarily need anything fancy like a file browser, but just the ability to change the string value through the UI would be massively helpful.
