

Tvheadend - Feature #4129

Feature Request - PVR - Autorec - Selection based on Series / Episode

2016-12-09 11:20 - Mark Siddons-Smith

Status:	New	Start date:	2016-12-09
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
Would it be possible to add a field to allow a specific series or episode be recorded?			
e.g. "s09" to record series 9 of a particular program "s09e04" to record episode 4 of series 9			
This is useful when a TV channel is broadcasting the complete set of episode of a particular program but we've seen all the series except the latest.			
Thanks,			
Mark

I would really appreciate a way to "skip series 2, 3 and 4" of a show, that means an *exclude* function in addition to the *select* that Mark suggests. A regex could do the trick, or two separate input fields.

#2 - 2019-01-05 21:47 - Rob vh

This is largely filled by <https://tvheadend.org/issues/5176>
Selecting minimum and maximum season number. Selecting the individual episode is not as important.
