Target version:			
Description			
<p>There is a lot of <u>1 channels</u> but <u>problem is that for many channels you can only find EPG for normal channel and not the +1 channel.</u> <u>An option to timeshift the EPG with -/ hours</u> for a channel would fix that. I know i can do that for a whole network but that doesn't work when i only want it for +1 channels.</p> <p>For m3u playlists i have seen an option it could import from if found. for example: tvg-shift="+1"</p>
