Target version:		Affected Versions:	
Found in version:	HTS Tvheadend 4.1-2405~geb495a0~xenial		

Description

Don't know if that happens to someone else... but sometimes kodi clients using tvheadend pvr client doesn't show the right picons... the picons are there but not on the correct channels.

I tried delete the picon folder on backend side and respective metadata... and clear the data on htsp client side... but problem persist... any ideas?

Picon is not fixed to channel only to channel ID
You can rename picon to Channel name and all should be ok
