<b>Target version:</b>	4.4		
<b>Description</b>			
<p>I think it would be nice to add (or at least to the TODO list) support for audio encoding with opus codec for a few reasons: 1 Opus is Open Source 2 Near all browsers support it (except from safari i think ) 3 Opus sounds better at low bitrate than vorbis or aac 5 it represents the state of the art audio codec for this times. As always thanks for your hard works to all tvheadend 's devs</p>
