

Tvheadend - Bug #4486

Can't compile ffmpeg

2017-07-18 14:19 - Josef Schlehofer

Status:	New	Start date:	2017-07-18
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected Versions:	
Found in version:	master (4.3-295~ga9dff7e9)		
Description			
Device: Turris 1.1 (PowerPC2020) Operating system: Debian LXC container (probably SID) Kernel: 3.18.58 (soon 4.4)			
I tried even compile it with parameter: --disable-ffmpeg_static , but no-go			
Here is log: https://pastebin.com/4fMEbWSD from terminal and here is log, which is located in: x264-snapshot there is config.log where is: https://pastebin.com/9evJjaQr			
I know this doesn't help much, but this was working probably 3-4 months ago. I tried latest version of x264, but it doesn't help me and there isn't new version of ffmpeg than 3.3.2. I will downgrade to 3.2.6 or 3.1.9 if it helps and will tell you result.

Full log is here: <https://pastebin.com/jsnLX0Q3>

I should have gcc compiler working.

#2 - 2017-07-18 15:04 - Josef Schlehofer

From #IRC

btw: "AUTOBUILD_CONFIGURE_EXTRA=--disable-ffmpeg_static ./Autobuild.sh" this should be correct, right? because when I changed line 154 in file: "Makefile.ffmpeg" from enable(d) to disable then I could compile it even with fpie or fpic

it seems that it is working and I even installed it. I tried TV Nova and HBO and it's working.

I even tried to check diff from details in web ui <https://www.diffchecker.com/T6p0a0YJ> and it seems good ;-)

Maybe someone has (or will have) my issue, too.
