<b>Description</b>			
It seems not possible to delete the actual .mkv file when I delete a recording from within xbmc-pvr. Only the log file is deleted.			
When using xbmc without the pvr/tvheadend addon on the other hand, and adding the tvheadend recordings directory as a source to the videos section of xbmc, I am able to delete the .mkv file, but not the log file.			
It would be very nice if both issues get resolved.			

### History

Btw, I am using the latest builds of both tvheadend and xbmc-pvr of dushmaniac's ppa

I have made a fix for this, which involves <https://github.com/andoma/tvheadend/pull/27> and <https://github.com/opdenkamp/xbmc/pull/59>  
Also, together with <https://github.com/andoma/tvheadend/pull/28>, you also don't get flooded with stale recording directories after deleting them  
Now, we just have to wait for andoma to review the code and (hopefully) merge it.
