Description			
<p>Hi, Following https://tvheadend.org/boards/5/topics/25428?r=26167: I still record a lot (about 45 programs per day). I had seen that some created files are never deleted. I have just noticed that my Tvheadend installation (4.3-295 ~ LibreELEC Tvheadend v8.1.444) is again very long to start (more than 10 minutes...). And again:</p>			
<pre>~/ .kodi/userdata/addon_data/service.tvheadend42/imagecache/meta # ls -l wc -l 154457</pre>			
<p>Most of them are older than the DVR retention time, that is to say obsolete:</p>			
<pre>LibreELEC:~/ .kodi/userdata/addon_data/service.tvheadend42/imagecache/meta # find . -type f -mtime +30 wc -l 151542</pre>			
<p>same here:</p>			
<pre>LibreELEC:~/ .kodi/userdata/addon_data/service.tvheadend42/dvr/log # find . -type f -mtime +30 wc -l 1809</pre>			
<p>I have deleted them:</p>			
<pre>LibreELEC:~/ .kodi/userdata/addon_data/service.tvheadend42/imagecache/meta # find . -type f -mtime +30 -delete LibreELEC:~/ .kodi/userdata/addon_data/service.tvheadend42/dvr/log # find . -type f -mtime +30 -del ete</pre>			
<p>and now it starts in 2 seconds :-)</p>			
<p>Would it be possible to delete these files automatically, when the associated recordings are (automatically) deleted? Thanks!</p>
