

Tvheadend - Bug #4701

Only audio gets played in a IPTV stream

2017-11-03 10:15 - Luka Karinja

Status:	Fixed	Start date:	2017-11-03
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	IPTV	Estimated time:	0.00 hour
Target version:		Affected Versions:	
Found in version:	4.3-git		
Description			
<p>Hello. lately i've been having more and more of this errors. tsfix: The timediff for AAC-LATM is big (266165), using current dts</p> <p>The stream gets only audio played. To get the video working i have to play and stop the channel a few times. Attached a 30s stream example. It's a IPTV stream</p>

Give a test with v4.3-604-g910fef467 .

#2 - 2017-11-04 12:16 - Luka Karinja

it works better for a few channels now. but for the same mux as i posted i get this now:

2017-11-04 12:11:17.760 tsfix: The timediff for TELETEXT is big (365400), using current dts

2017-11-04 12:11:26.905 tsfix: transport stream TELETEXT, DTS discontinuity. DTS = 900000, last = 0

still no picture only audio

#3 - 2017-11-04 17:55 - Jaroslav Kysela

v4.3-607-ga5ecd97a9 . Otherwise, provide the non-working .ts input again.

#4 - 2017-11-04 23:47 - Luka Karinja

v4.3-607-ga5ecd97a9 fixed it.

thanks to all the hard work you are putting in it

#5 - 2017-11-14 09:00 - Jaroslav Kysela
