

Tvheadend - Bug #4746

Service not starting (systemd)

2017-11-27 16:03 - David jrm

Status: Accepted	Start date: 2017-11-27
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Configuration	Estimated time: 0.00 hour
Target version:	Affected Versions:
Found in version: From 4.3-683~gc201bd9 onwards	

Description

Hi,

Since the last package updates for Ubuntu, tvheadend seems to be installed properly, however it doesn't start at all. Launching tvheadend from console I saw it is installed on "/home/*user*/.hts/tvheadend" instead of "/home/*hts*/.hts/tvheadend" as was till few updates ago.

The last version I'm able to upgrade and retain all configuration etc is 4.3-683~gc201bd9, so uninstalling the most recent and installing manually this version, it run as expected.

Could anyone check this?

Thanks

What is the contents of /etc/default/tvheadend? And what version of Ubuntu?

What does

```
sudo systemctl status tvheadend
sudo journalctl -xe -t tvheadend
```

output?

What does [...] output?

Thanks Mark! I didn't check the service status and this was the issue...

So looking to the systemctl status:

```
$ sudo systemctl status tvheadend
```

```
□ tvheadend.service - Tvheadend - a TV streaming server and DVR
```

Loaded: loaded (/lib/systemd/system/tvheadend.service; disabled; vendor preset: enabled)
Active: inactive (dead)

I enabled the service with `sudo systemctl enable tvheadend` and now is working as expected.

Not sure why till some versions the service was always enabled and with the recent no...

Thx again

Latest git master has a service file included. Did you already have one setup?

- *Subject changed from Ubuntu package not updating properly to Service not starting (systemd)*

- *Status changed from Need feedback to Accepted*

I've updated the title so that others don't open issues with a similar problem!
