

Tvheadend - Feature #4819

webui: edit autorec - show channel number and/or the source in channel list

2017-12-28 00:27 - Al Bundy

Status:	Fixed	Start date:	2017-12-28
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:	User Interface	Estimated time:	0.00 hour
Target version:	4.4		

Description

I have one dvb-s2 single tuner and three dvb-c sat>ip tuners.

So I also have some channels twice in the list because they are available over dvb-s2 and dvb-c.

So I cannot decide which Channel is the right one.

If it doesn't matter which channel I choose because I've already selected a channel tag to identify the correct service then only unique channelnames should be displayed.

webui: add possibility to colorify channel names with numbers and/or source (like DVB-T), fixes #4819

Revision 944121fb - 2018-01-05 16:50 - Jaroslav Kysela

api: channel list - sort the channels by numbers by default, issue #4819

History

#1 - 2017-12-28 20:24 - Jaroslav Kysela

- Subject changed from *webui: edit autorec - show service in channellist* to *webui: edit autorec - show channel number in channel list*
- Target version set to 4.4

I believe that we should show the channel number instead the service name for this purpose.

Service would be better because maybe users did not set channel numbers.

In my case I set the same channel numbers for dvb-c and dvb-s2 - so service would be better to identify a channel. ;-)

#3 - 2018-01-04 20:56 - Jaroslav Kysela

- Status changed from *New* to *Fixed*
- % Done changed from 0 to 100

Applied in changeset [tvheadend/f00d5bb402ff85d608a9c638f1b70fb498973a6a](#).

#4 - 2018-01-04 20:57 - Jaroslav Kysela

Why don't you edit the channel name then? I added the possibility to add channel number and the source identifier (like DVB-T) to the channel names - see the general config.

Showing the Source sounds good.

Can you describe how to do this?
(build is currently running)

#7 - 2018-01-04 22:11 - Jaroslav Kysela

Configuration / General / Base - Web interface settings - Channel name with sources

Perfect - now I can select the correct channel.
Thank you

Small issue (was maybe also before).

It seems that the channellist while editing an autorec is ordered alphabetically.
So the order by displayed channel numbers looks strange (1,10,11,....,2,20,21,....,3,30,...)
Maybe it would be better to sort the list by channel number, name and source (in this order).
