#### Description

Sometimes I browse the EPG to look at the programmes available on new channels, or to look for new programmes which might interest me.

Unfortunately the EPG shows all events -- including repeats (reruns) and other episodes.

Would it be possible to have a feature added to TVHeadend's EPG UI which "stacked" programmes?

For instance -- a dropdown box "Stacking" which could be set to:

- No stacking (show all programmes matching the filter) \* By title (hide programmes which have the same title as another already in the list -- i.e. "show only unique titles") \* By title and subtitle (hide exact repeats -- where the title and subtitle are the same as another entry) \* By title and episode (hide exact repeats, but using title and episode instead of title and subtitle)
