Description Hello there, I have tried anything but I still get these continuity counter error after few minutes watching iptv channel. I'm on a 4.3 version running on a raspberry pi 3 (overclocked). Got this error on 4.2 and tried to upgrade to fix the issue. Note that this only appears on some channels. Thanks

You must provide the stream, at least.

#2 - 2018-03-05 19:21 - Cooper Dev

For security I prefer not.

But I managed to see something. With VLC the stream do no stop but sometimes it has really small freezes (like when you don't have enough signal) I guess it's the reason tvheadend stops the stream. But could it be possible to let it continue when that happens ?

#3 - 2018-03-05 20:52 - Jaroslav Kysela

TVH does not break on error if configured to behave like this (stream profiles). Again, if you like, I'll give a quick look to this issue, but I need the stream for testing. You can send me URL through PM (I have perexg nick on IRC #hts).
