| Category: | User Interface | Estimated time: | 0.00 hour |
| Target version: | | Affected Versions: | |
| Found in version: | 4.3-1252~g595fd174f | | |
| Description | | | |
| after compiling (Raspberry pi 3 B+) and installing with sudo dpkg -i tvheadend_4.3-1252~g595fd174f_armhf.deb on opening the web interface for the first time I need to first login with user "admin" and password "admin" but then I end up with a "no verified access" page (no config tab) and if I try to login again I end up in a login loop. | | | |

History

#1 - 2018-05-28 14:53 - g siviero

If I install version: tvheadend_4.3-1233~g4fe0af0e8

on opening the web interface for the first time I need to first login with user "admin" and password "admin" and then the Wizard Welcome/Language starts.

As far as I'm concerned this issue can be closed. I completed correctly the setup process with the latest git, using the setup wizard. The installation works fine.
