Description

A feature I have on nextPVR that I cant seem to find on tvheadned.

I am able to move to say 7PM on the nextPVR guide, then I can see the next 4 hours, then I can CTRL right arrow and go to the next day. In this way, as I only record shows between 6:30PM and 10:30 PM, I can wizz through the guide's 7 days in no time to check recordingsn fure new ones etc. I just do this once a week.

On TVHeadend EPG Guide screen, adding a filter for the start time to end time would accomplish the same thing for me - that way, by selecting my channel group, and these time, I will just have the few TV shows that fall into that time period for the entire week.
