| Found in version: | 4.3-1288 | | |
| Description | | | |
| Hello, | | | |
| with me is the TVH 4.3 (1288). The clients (Telestar Digibit 30 and 33) rarely find the TVH Sat> IP server. The VLC (version 3) found the server only once via upnp. | | | |
| With Kodi and the ADD TVH it runs flawlessly. Error in the TVH Satip server? | | | |
