

Tvheadend - Bug #5327

relative recording path

2018-11-13 13:59 - Joe User

Status:	New	Start date:	2018-11-13
Priority:	Normal	Due date:	
Assignee:	Adam Sutton	% Done:	0%
Category:	PVR / DVR	Estimated time:	0.00 hour
Target version:		Affected Versions:	
Found in version:	4.3		
Description			
<p>More of an inconsistency than a bug... I created a new profile and mistakenly missed the leading "/" when cutting and pasting the "Storage path". A few autorecords used the new profile, but all the recordings showed up in "failed recordings" with a status of "file missing". While looking into the problem. I found that the recordings actually were made (and even subdirs created) in the correct place. But, in the dvr/log file, the filename was set without the leading "/" and so it cannot find the file and sets it to missing.</p>

Could you show some logs (--trace dvr)? (no time to do it myself)
