Atom links appear to be working ok here, is this still the case?

#3 - 2018-11-26 11:13 - saen acro

HOWxA2L.png
still same

#4 - 2018-11-26 11:29 - saen acro

I'll look into this.

#7 - 2018-11-26 16:11 - saen acro

I can test wink.png

p.s. branding is also gone

Is it possible to implement the Redmine API? To connect from Android apps, for example. tongue.png

#9 - 2018-11-26 16:35 - saen acro

Pablo R. wrote:

I have 27" 3K PC screen biggrin.png

#10 - 2018-11-28 00:12 - saen acro

Any update on case?

#11 - 2018-11-29 14:54 - Dave H

This is a bug tracker, not a discussion forum. Please open a separate enhancement request.

It's a very annoying and presumably fairly simple bug to fix. Any progress to report, please?

#13 - 2018-12-01 21:14 - saen acro

Just guessing but,
website is behind NGINX and RSS read not described DNS but localhost=127.0.0.1
That's why links inside RSS are wrong and on site are correct.

There hasn't been any update since this statement, and according to <https://tyheadend.org/users/1> Andreas hasn't logged in since.

Is anybody in contact with him that could ask whether there is any progress, or if there is some change in his circumstances could somebody else take a look at this annoying problem, please?

#15 - 2018-12-11 23:18 - Andreas Smas

- *Status changed from New to Fixed*

This should be fixed now.

#16 - 2018-12-12 06:25 - saen acro

check.pngfixed

#17 - 2019-02-27 00:44 - Andreas Smas

This issue is unfortunately temporarily back.

I'm trying out different rails servers for redmine.

It will be resolved before the end of the day.

#18 - 2019-02-27 04:37 - Andreas Smas

Should be OK again.
