<b>Description</b>			
<p>New since upgrading to tvheadend 4.3 on ubuntu, icons are not being transferred to my kodi client anymore. All is good within the admin web page e.g. it does show the channel icons when going into the detail of a program. Although it fails to show them in kodi client?!?</p> <p>I've noted the following, when reinitializing the channel icons in tvheadend, kodi show the sort of "unavailable icon" for a short while then eventually it show no icon, like it either doesn't recognize what it receives OR it receives an empty image perhaps?</p>

Check in configuration/general/base tab that option "Authentication type" is set to "Both plain and digest".

It saved the day and icons started showing within a few seconds!  
Adding that to my personal documentation, thnx a lot!

I wonder when kodi fixes that! (Add the digest authentication.)

- Status changed from New to Invalid

Created an issue for pvr.hts (but it may be an issue in the kodi core code).
