| Description i updates to last version i now tvheadend dont start i got this error Dez 02 16:48:07 TV-Head-End systemd ¹ : Failed to start Tvheadend - a TV streaming server and DVR. Dez 02 16:48:07 TV-Head-End systemd ¹ : tvheadend.service: Unit entered failed state. Dez 02 16:48:07 TV-Head-End systemd ¹ : tvheadend.service: Failed with result 'timeout'. | |

History

#1 - 2018-12-02 16:25 - Chris master

Version 4.3-1610~g79ea2a4~xenial

#2 - 2018-12-02 16:42 - Pablo R.

Chris master wrote:

Version 4.3-1610~g79ea2a4~xenial

Could you look sytemctl log // service tvheadend status

or

/var/log/syslog too look for a crash or whatever happens.

#3 - 2018-12-02 19:06 - Chris master

That does not apport much.

try executing tvheadend directly on terminal.

```
/usr/bin/tvheadend -f -u hts -g video
```

Also look for an ouput for

```
cat /var/log/syslog | grep CRASH
```

Sorry,

[...]

tvheadend run for some minutes then it stops.

i cant connect to webif.

after some minutes it runs aigain for some minutes

#7 - 2018-12-02 20:05 - Pablo R.

But it crashes?

Did you tried last? v4.3-1616~g39b74cbd8

Some bugs where fixed.

#10 - 2018-12-02 20:16 - Chris master

ok after update it runs

i hope that it will not be haning again

#11 - 2018-12-03 12:05 - Chris master

system is running now, but if i enable the satip server. tvheadend will crash

#12 - 2018-12-03 12:24 - Pablo R.

Chris master wrote:

I will check that this evening. Are you using 4.3-1617?

What is the way to reproduce the crash? Simply activate the server while it is disabled?

#13 - 2018-12-03 13:00 - Chris master

I just tried but it does not hang or crash. Maybe export tunners is needed? I currently doesnt have tuners to export/test.
