Description			
Hi,			
please add an "EPG scan" (enable/disable) option on Networks level . Currently, you can only set it when a new MUX is created (ie automatically from IPTV Automagic Network), it is on Auto.			
This nearly melted my router when my ISP modified all their TV-Channels (thus, tvheadend created and mapped ~300 new channels, which where epg-scanned a few minutes later, all at the same time, slightly too much for my 50mbps) wink.png
