hi,

i did it.

first log with htsp-ans, the other one with htsp-ans and +debug-all
running with 4.3-1693~gfee0b53e9

last known working version is 4.3-1525~g29d501042

i think the error exist since the big imagecache cleanup in code.

The "image": "imagecache/#" replies seem ok.. So it must be in the "fileOpen" method, but I don't see the request reply from the kodi. Have you tried to look to epg?

what u mean with "Have you tried to look to epg?"

if u mean the image url in the epg ? yes thats working.

if u mean the downloaded imagecache access like imagecache/10239 yes thats working too.

when i do a downgrade to 4.3-1525~g29d501042 with the same xml epg the images appears by kodi.

aah sorry... bad english wink.png

when i look into the kodi epg with current git, no images are showing, i dit this when i was debugung. (i also delete all pvr data so that kodi do a new

sync)

maybe this help.

in the old version the image get is the complete url.
maybe this shpud be changed in the kodi htsp client, because kodi should use the downloaded imagecache provided by tvheadend.

I tried to add compatibility code for the older clients and created pvr.hts issue: <https://github.com/kodi-pvr/pvr.hts/issues/390> .
