<b>Description</b>			
Sat receivers have a function to send dish motor to 0. Could you add the same function to tvheadend?			

#### History

##### #1 - 2018-12-29 21:25 - Jaroslav Kysela

What's the exact function of this? Park the rotor to 0 when idle?

I wonder if what he wants is a button to do it manually.

That's right. I'm talking about a button that could send the motor to 0.

Isn't better to sent this command when service start/restart also?

In my opinion the button will be more convenient

Anyway what is the need, I am curious... Align the dish? Cleaning?

Sometimes the motor does not reach the position. Sending it to 0 helps, and after the motor goes to the desired position normally.

Yes many times my rotor "get confused" and thinks it is at a position when its actually at another. Re sending it to zero on an enigma2 usually solves the problem. It would be handy to have something similar in tvheadend as well.

**#9 - 2019-01-02 07:36 - Vlad Lanetz**

So is it possible to add this feature to tvheadend?
