

## Tvheadend - Feature #5472

### XMLTV Export to file

2018-12-31 16:35 - T Pedersen

<b>Status:</b>	Rejected	<b>Start date:</b>	2018-12-31
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Adam Sutton	<b>% Done:</b>	0%
<b>Category:</b>	EPG	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Description</b>			
Hi.			
Could this be done in future?			
Only possible from terminal now, but would be nice to get it from web, like u guys did with channels.m3u.			

### History

#### #1 - 2018-12-31 17:52 - saen acro

already exist  
<http://tvh.ip:9981/xmltv>

#### #2 - 2018-12-31 19:01 - T Pedersen

saen acro wrote:

already exist

When I try this with f.ex Perfect player it wont read it, suspect its not in a xml file pr.say, so nogo. Works with tvirl with <http://tvh.ip:9981/xmltv/channels/?auth> xxxx&password but not others i tried... Only /xmltv/ gives me 404..

#### #3 - 2018-12-31 19:20 - Joe User

Look at the bottom of this page for examples:  
[[<https://github.com/dave-p/TVH-API-docs/wiki/Other-Functions>]]

So in other words. NOT implemented yet. Cannot se any solution for an "xml file" generated from web, only trough terminal....

#### #5 - 2018-12-31 20:01 - saen acro

Why terminal use your web browser.

#### #6 - 2018-12-31 20:09 - T Pedersen

saen acro wrote:

Sorry I dont get it, but i wanted a way that players like perfect player direct fetches an xml file direct from my tvh. server, instead of creating it from an web browser or terminal command

#### #7 - 2018-12-31 20:37 - Joe User

Sorry, I guess we do not get it - saen acro gave you exactly what you asked for "XMLTV Export to file". Maybe you need to start over again.

Ok. I want to get a readable "xml file"(instead of plain) from my server that players like perfect player can read, only some players support plain and somewhat most players want an file. Better explained <http://tvh.9981/xmltv/channels/channels.xml>.. Get it?

Not sure how you configure perfect player but put url of playlist and epg and all is done on android can be used "PROGTV"<https://play.google.com/store/apps/details?id=com.progdvb.progtva> else use KODI

#### **#10 - 2018-12-31 20:52 - saen acro**

Still not get the idea from where you get this url

`http://tvh:9981/xmltv/channels/channels.xml`

when url is just

`http://tvh:9981/xmltv/channels`

there is a link to manual with you not read

Only tested this onde, but when i try putting epg url as u say <http://tvh.ip:9981/xmltv>, nor xmltv/channels/?auth it doesnt work with perfect player. It fails because it wants as and file f.ex xmltv.xml

I know the url is /xmltv/channels/, channels.xml is a pure example of a output file on server

**#14 - 2018-12-31 21:10 - saen acro**

This is problem of creator of perfect player, connect to him to fix it, this is not problem of TVH.

try [PROGTV](#)

**#15 - 2018-12-31 21:10 - Pablo R.**

Tom-Frode Pedersen wrote:

Did you try

`http://username:password@tvh:9981/xmltv/channels`

Those URLs need credentials.

**#16 - 2018-12-31 21:12 - T Pedersen**

Yep. Did this. Maybe because i have multiple epg grabbers with different priorities, nor maybe my tvh version

try [PROGTV](#)

Maybe so. But tvh should have different solution to different very known players

**#18 - 2018-12-31 21:39 - saen acro**

If software cannot grab live output of URL, its not good written.  
There is no need to download store parse and delete,  
when only live url parse is enough.  
This is not problem of TVH is is a problem of developer of not so**Perfect Player**.

You problem is same as software's with NEED live streams with must end with **.TS**  
But why it must end with **.TS** no one can explain.

**#19 - 2018-12-31 21:40 - Pablo R.**

Its easy, do a cron or so and with a web server you can provide that file to your clients. tongue.png

**#20 - 2018-12-31 22:11 - T Pedersen**

Pablo R. wrote:

Im been doing so,but if tvh could provide xml file native on server i dont need to.

**#21 - 2019-01-01 00:57 - saen acro**

*Instead of curing the disease, we will treat the symptoms.*  
TVH is server, the client has to adapt to it, not the vice versa.

**#22 - 2019-01-01 06:30 - T Pedersen**

saen acro wrote:

Sure. I'll get it, Just continue with cronjob then for numerous clients with other players that cant grab live xml url.. There is actually alot of disease out there.. biggrin.png
