

## Tvheadend - Bug #5600

### Pending scans get stuck in pending in a special case

2019-04-11 22:51 - Flole Systems

<b>Status:</b>	New	<b>Start date:</b>	2019-04-11
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Target version:</b>		<b>Affected Versions:</b>	
<b>Found in version:</b>	4.3.1789		

**Description**

I have an IPTV source limited to 1 stream, when I force a scan it'll start going through the sources. Now if I watch a channel the scan is of course interrupted to allow me to watch the channel, but once i stop watching it doesn't continue but all channels are stuck in pend. If I select 2, check the checkbox for pend and click ok the scan continues. I would expect it to automatically continue once it's possible.

### History

#### #1 - 2020-06-06 19:06 - Pablo R.

I also see that problem for DVB-T/S devices.

#### #2 - 2020-06-29 16:25 - Anonymous

```
systemctl stop tvheadend.service
```

```
sleep 1
```

```
systemctl start tvheadend.service ; tail -f /var/log/messages
```

will solve the problem.
